

Remembered Voices LLC
Your priceless verbal legacy - available any time, any place

FOR IMMEDIATE RELEASE

Remembered Voices Partners with Hosting.com for a Secure and Reliable Managed Hosting Solution

New Hampshire tech startup prepares for high traffic launch

KENSINGTON NH, Apr. 23/da Vinci Group Inc. - After a thorough screening process of over 15 datacenters, [Remembered Voices](#) has selected [Hosting.com](#), a leading provider of hybrid hosting, business continuance and compliance solutions, as their managed hosting partner.

This partnership will enable Remembered Voices to provide a secure, reliable internet based archive for customers worldwide to record their voices for family and friends to access from any phone or internet connection.

Remembered Voices offers their customers the option of recordings online and by phone, while their selected friends and family can listen to the same recordings online and by phone. Remembered Voices is the first company to offer this type of service, and has selected a scalable solution with Hosting.com to meet the rapid growth anticipated in the coming years.

"Hosting.com was selected over the others for two reasons," says Tom Godek, Director of Operations at Remembered Voices. "First, they were able to provide the level of a fully managed, hosted solution that we sought. The second reason for selecting Hosting.com was their participation in the [Microsoft BizSpark™ program](#). As a BizSpark participant, they were able to sponsor Remembered Voices in the BizSpark™ program, and configure our servers using Microsoft licensing at a reduced cost."

Mr. Godek explains that "as a start-up, we needed an IT partner who would play the role of network administrator and DBA, who was also available to assist with any other infrastructure related challenges we may face. Many of the other hosting companies would stand by their infrastructure, but few were willing to commit to the managed services we needed completed by our partner. So far, Hosting.com has lived up to their commitment to Remembered Voices."

About Hosting.com

Hosting.com is a global provider of enterprise-class IT infrastructure solutions, services and facilities. Hosting.com's geographically-dispersed data centers and Cloud Super Sites coupled with the industry's top networking and connectivity technologies provide clients with the highest levels of security, reliability and support. The most recognized names in Retail, Financial Services, Healthcare, Government, Technology and Web 2.0 rely on Hosting.com's colocation, cloud hosting, dedicated and managed hosting solutions.

About Remembered Voices

Remembered Voices is an audio archive service for creating and preserving voice recordings. Subscribers can create, manage, and share voice recordings by landline phone, cell phone, and online; their recordings are archived for the duration of their subscription. There is no degradation in sound quality, and recordings are accessible 24/7 through any touchtone phone, cell phone, or internet connection.

The service can be used to save voicemail messages, connect military families across time zones, dictating journals, and [grandparent interviews](#).
